

All training for the Australian CDR Summit is being provided by approved Bosch CDR Trainers Brad Muir and Jon Northrup of Crash Data Specialists LLC, who over the past 2 years, have been instrumental in assisting with the expansion of CDR technology and education to the Australian Market.

## CDR Operator, Analysis & Applications Update Class

Sat-Sun, 28-29 September 2013

This class will include all significant updates over the past approx. 2 years, including Chrysler, GM, Holden, Honda, Toyota, Mazda, Suzuki, BMW and Volvo and bring attendees current in their CDR training to the current release version as of the class date (currently version 10.1).

Training includes both Operators updates (i.e. similar to others Technician 1 and 2) and provides information on downloading through the DLC (including back-powering techniques and required information for newer vehicles), Direct to Module and Bench top downloads.

The Analysis and Applications updates covers line-by-line analysis of the key information needed to understand the newest CDR Data from Chrysler, GM, Ford, Honda, Toyota, Mazda, Suzuki, BMW and Volvo including example reports and real-world crash examples (where available). An update to the US Part 563 rule and other pending relevant legislation will be discussed.

The update class will include information on the coverage and use of the KIA and Hyundai EDR tools as well.
